Assessment

Strengths

Demonstrates strong soft skills such as teamwork, adaptability, organization, and autonomy, which are valuable in any professional setting.

Possesses a proactive and dynamic attitude, as evidenced by multiple student jobs and internships.

Is multilingual, with proficiency in French, English, Chinese, and Spanish, which can be an asset in an international environment.

Areas for improvement

Develop foundational technical skills in programming languages like Python and SQL, which are essential for the role.

Acquire specialized knowledge in artificial intelligence and data science, either through formal education or self-study.

Gain a deeper understanding of financial markets and instruments, as required by the investment management context of the role.

Pursue education or certifications in computer science or engineering to align with the technical requirements of the position.

Recommendation

 Not recommended for this role.
