(ISCOM)

Relevant experience

The candidate has completed internships as a Community Manager and Assistant Project Manager, alongside various student jobs. While these roles demonstrate general work ethic and transferable soft skills, they do not include any direct experience in data analysis, programming, or financial audit, which are core to the Data Scientist Internal Audit role.

Key skills

Excel Recherches et analyses d'informations

Adaptabilité Sens de l'organisation

Esprit d'équipe

Assessment

Strengths

Demonstrated work ethic through multiple student jobs and internships.

Strong soft skills including adaptability, organization, teamwork, and autonomy.

Multilingual proficiency in French, English, and Chinese.

Experience in content creation and social media management, indicating communication skills.

Areas for improvement

Develop foundational technical skills in data science, such as programming languages (e.g., Python, R, SQL) and machine learning frameworks.

Pursue formal education or certifications in data science, data engineering, or a related IT field to align with the role's specific requirements.

Gain practical experience in data analysis, data manipulation, or automation projects.

Acquire knowledge of financial markets and internal audit processes relevant to a CIB environment.

Recommendation

 Not recommended for this role.
